EDUCATION

Northeastern University, Boston, MA **2027**

B.S. in Computer Engineering and Computer Science

Related Coursework: Algorithms and Data Structures, Object-Oriented Programming, UX Design, Cybersecurity, Computer Systems, Networks, Embedded Design, Discrete Structures, Differential Equations, Linear Algebra, Probability and Statistics

EXPERIENCE

Qualcomm **San Diego, CA**

Software Engineer Intern *May 2026 - Aug 2026*

- Built a comparison analysis platform that supported **150+ engineers** decompressing and comparing non-volatile (NV) radio data across 5 wireless standards, replacing a legacy Qualcomm analysis tool, **reducing analysis time by 80%**
- Eliminated gaps in modem configuration analysis by developing a C++ XQCN generation pipeline that captured 100% of previously excluded static NV data, replacing multi-MB filesystem traversal with direct in-memory re-serialization
- Reduced manual search time **by 40%** integrating an LLM-powered natural-language **chatbot (Flask) and MCP server**

Matcha Flow **Boston, MA**

Technical Product Lead *Jan 2026 - May 2026*

- Defined **6 product requirements** across 10 subsystems from client needs, partnering with **2 leads** through weekly check-ins and milestone design reviews to manage product scope, budget, resources, and team guidance
- Led cross-functional development of an automated matcha machine demoing to **400+ attendees**, aligning 3 different engineering disciplines to consolidate a 4-step manual brewing process into one-touch operation, **shipping in 10 weeks**
- Scoped the MVP around the core brew experience, deprioritizing drink-size selection to reduce UI control hardware and overall build time, and streamlining the matcha and water dispensing flow to deliver a **45-second brew**

Soundry AI **Seattle, WA**

Product Designer Intern *Jul 2025 - Aug 2025*

- Conducted **50+ user interviews** and analyzed feedback from **100+ community members** within Soundry and evaluated competing platforms to identify key user pain points, engagement barriers, and platform safety concerns
- Designed and iterated on 5+ user research plans, wireframes, and prototypes using **Figma**, incorporating usability feedback, and delivered a final prototype and roadmap to guide the platform's engagement and moderation strategy

Insulet Corporation **Acton, MA**

Software Engineer Intern *Jan 2025 - Aug 2025*

- Developed Python scripts for **75+ users** to parse and analyze diabetes-sensor data logs for device activation and sensor status, streamlining data processing workflows and reducing processing time from **2 hours to under 15 minutes**
- Led reliability testing across 25+ devices, validating sensor connectivity with development boards and smartphones, and confirming zero connectivity errors across all test runs, using Tera Term logs to consolidate and verify results
- Redesigned complex finite state diagrams by merging redundant paths, cutting reading time from **5 to under 3 minutes**

PROJECTS

Nudge *Oct 2026*

- Built the MVP of a roommate expense-tracking web app using Next.js, TypeScript, Supabase (PostgreSQL), and Vercel, interviewing 30+ Northeastern students, synthesizing findings into personas and a PRD that defined MVP scope

Sageware *Feb 2026*

- Designed and shipped the UX layer for an automated bead machine in 10 weeks for 200+ users, on Zephyr RTOS, building a custom timer+DMA LED driver on a non-SPI pin and interrupt-driven, debounced button input for feedback

NLTK Resume Parser *Jun 2025*

- Built an NLP-powered resume screening tool that parsed and analyzed 200+ PDF resumes, using token similarity and keyword matching to surface candidates aligned with job requirements, reducing manual resume review time by 50%
- Created an interactive Plotly Dash dashboard to visualize candidate-job fit across job descriptions, displaying matches

SKILLS / ADDITIONAL

Programming: C++, C, Python, SQL, Bash, MATLAB, Java, JavaScript, React, HTML/CSS

Product Skills: Figma, Notion, Jira, Miro, Agile, MVP Scoping, Competitive Analysis, User Interviews, Product Prototyping

Tools & Technologies: Git, Docker, REST APIs, Flask, MCP server, Excel, Microsoft Office, Claude Code, ChatGPT, Codex

Interests: Tennis (7 years), Sudoku, Chess, Basketball, Mountain Biking, Surfing, Electric Guitarist
